

STEP OUT OF THE ORDINARY AND PREPARE FOR AN EXCITING CAREER IN CONSTRUCTION

WE WANT YOU TO CARRY ON OUR PROUD TRADITION

The Sisters in the Brotherhood's mission is to create a network of active Sisters who will promote the values of leadership, strength and unity within the labor movement. Our valuable mentoring network will provide you with the tools to be confident and successful in a highly competitive industry.

We advocate for more involvement from Sisters in all levels of union leadership and activities because when women work, we all benefit.

Joining the NRCC is an OPPORTUNITY that will EMPOWER you to SUCCEED.

"I honestly feel that without the Carpenters Union I would have never been able to buy my own house or send my son to a good school. If I wasn't in a union, I would have been dependent upon somebody else to provide those things. It gave me a lot of independence."

- Shereen Quattromani

AT THE NORTHEAST REGIONAL COUNCIL OF CARPENTERS JOBS DON'T HAVE A GENDER

BUILD A CAREER IN CONSTRUCTION

The Northeast Regional Council of Carpenters is dedicated to providing fair pay, great benefits and the most up-to-date skills training in the industry. You will find there are women just like you who enjoy the challenge.

In the Northeast Regional Council of Carpenters, which represents thousands of union carpenters in New Jersey and New York State, women are in every area of the trade: as foremen, superintendents and instructors and, of course, on job sites—as carpenters on all kinds of projects: heavy highway, interior systems, millwork and commercial cabinet makers, and floorlayers.

Our apprenticeship program will teach you the skills today's employers are looking for.

A CAREER IN UNION CONSTRUCTION CAN PROVIDE...

- High earning potential
- Paid technical education
- Earned credits toward a degree
- Opportunities for advancement
- A lifelong skilled trade

...WITH NO STUDENT LOANS

WE DO MORE THAN BUILD HOUSES

GENERAL CARPENTRY

General carpenters provide the crucial work on most every type of structure found in our world. From skyscrapers and hospitals to office buildings, prisons, schools, hotels, bridges, highways, infrastructure, and beyond, carpenters are responsible for bringing the blueprints for these structures to life.

DOCK BUILDING & PILEDIVING

Dock building and pilediving is a specialty trade that provides heavy foundation, earth retention, marine construction, and commercial diving services.

MILLCABINET

Cabinetmakers and millworkers fabricate and install both decorative and functional elements, including trim and molding, cabinetry, ceiling treatments, doors, windows, exposed columns and beams, displays, mantels, staircases, and much more.

FLOOR COVERING

Floor layers install a wide variety of flooring materials, including carpet, resilients, wood, laminates, and sport surfaces.
